

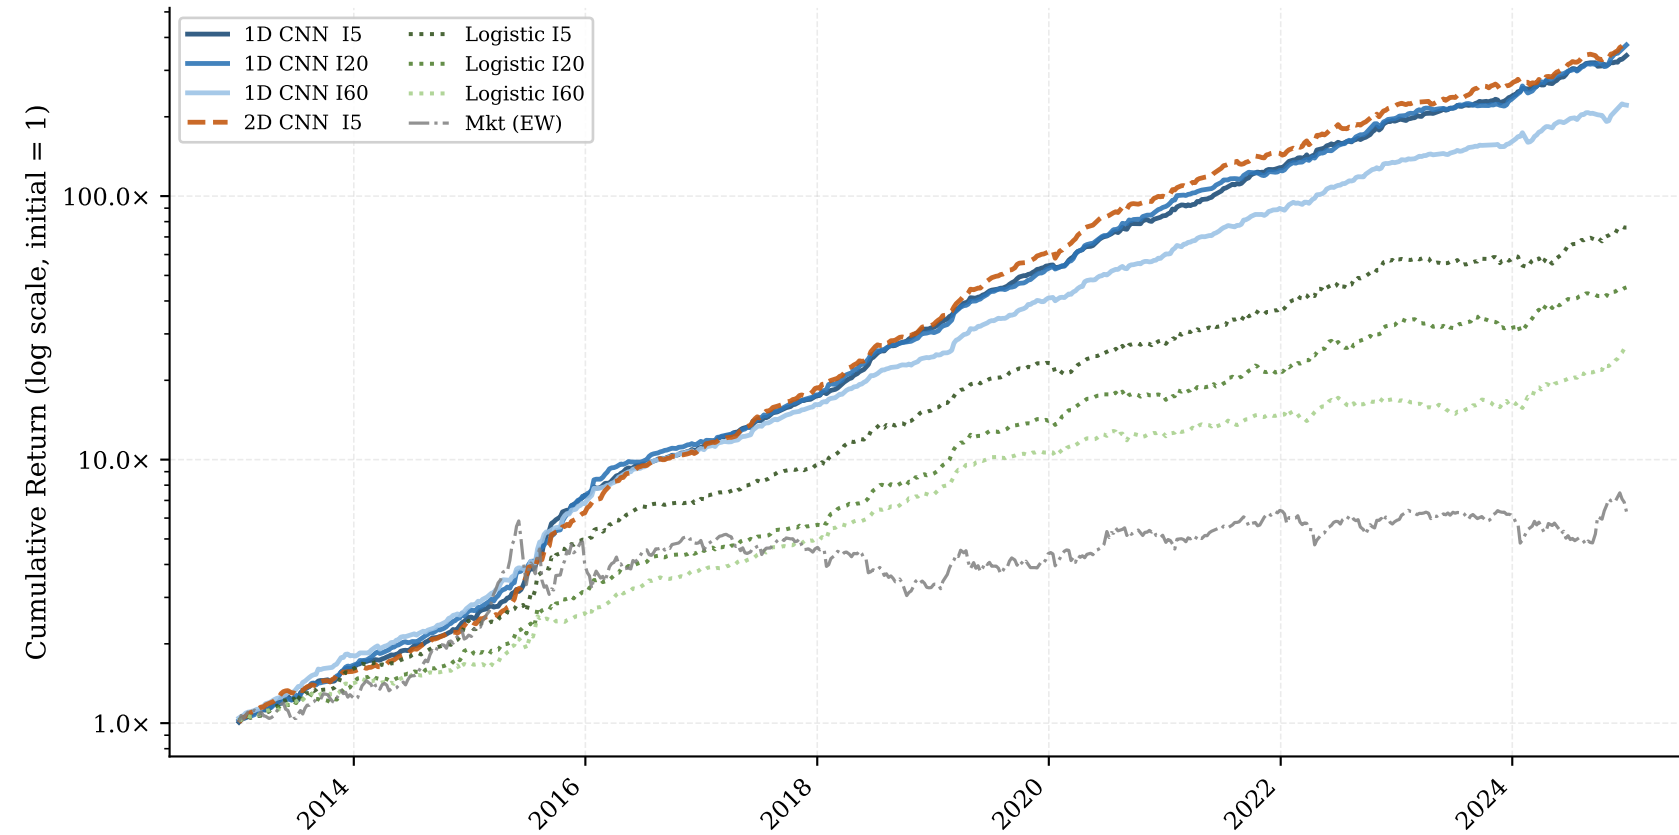

Figure 2. Cumulative Long-Short Return — R5 (Weekly Rebalancing)

Note: Long-short portfolio is long decile 10 and short decile 1, rebalanced every 5 trading days (~weekly). Returns shown are gross of transaction costs. Net-of-cost Sharpe ratios (10 bps one-way) are reported in Table 1. Mkt (EW) is the equal-weight mean return of all universe stocks on the same rebalancing dates (long-only reference).
