

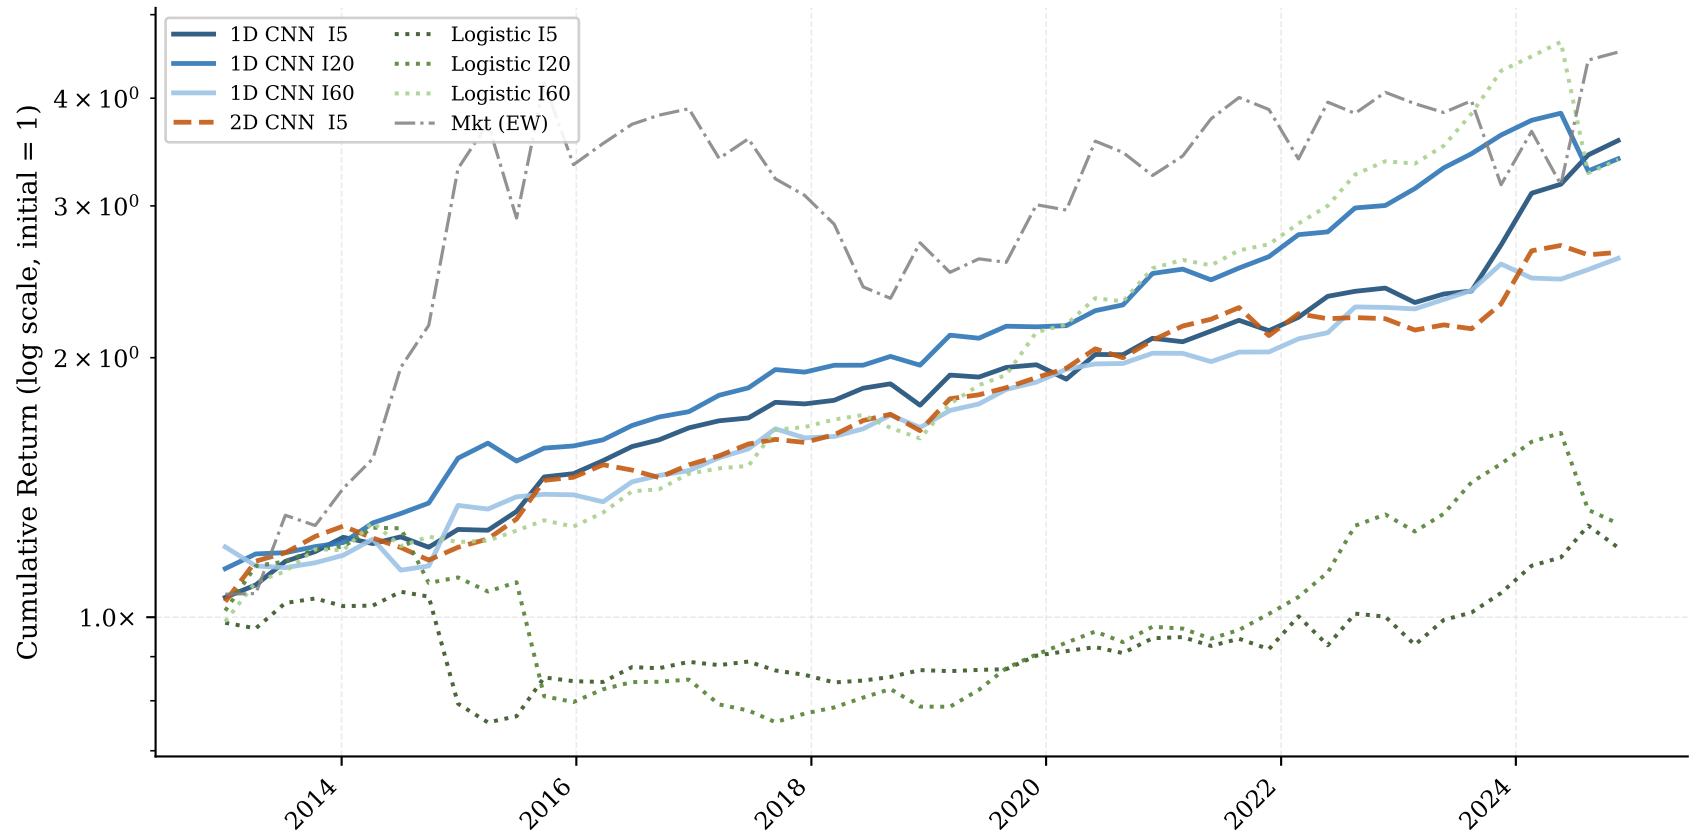

Figure 4. Cumulative Long-Short Return — R60 (Quarterly Rebalancing)

Note: Long-short portfolio is long decile 10 and short decile 1, rebalanced every 60 trading days (~quarterly). Returns shown are gross of transaction costs. Net-of-cost Sharpe ratios (10 bps one-way) are reported in Table 3. Mkt (EW) is the equal-weight mean return of all universe stocks on the same rebalancing dates (long-only reference).
